

Wireless Services

Wireless Partner

Through our strategic partnership with Verizon Wireless, Grudi Associates delivers innovative, cost-saving wireless and data solutions. We make it simple and efficient by providing a single point of contact for all your needs.

The Right Wireless Partner

Grudi Associates can help you increase your productivity, responsiveness and capabilities with the power of today's mobile voice & data solutions.

Your Best Source for Mobile Communications—Through our strategic partnership with Verizon Wireless, we offer the leading national plans and options to meet all your mobile communications needs. Your Grudi Associates representative will make it quick and easy to choose the best plan through a single point of contact.

We've Got You Covered—We'll ensure that your plan provides the coverage and features you need.

Lowest Rates, Best Plans—We know about all the latest rate plans and promotions, so we can offer the most economical package that meets your needs.

The Power of PDAs—Wireless communications have come a long way since the days of basic cell phones. Today's wireless voice & data devices—like BlackBerry®, smart phones and other PDAs—keep you connected, so you can do business anywhere, anytime.

Innovative Solutions, Simplified Telecommunications—Our team of experts will help you choose and implement the best solution for your business, then keep you informed about new mobile voice & data options that can help optimize your wireless communications.

Relationships That Connect

Our award-winning staff takes customer service to the next level by helping you communicate more efficiently, effectively and economically. Our focus is on long-term relationships, not one-time sales. Ask our current customers. We'll be happy to provide references!

In addition to wireless services, Grudi Associates delivers innovative and cost-saving data, high-speed Internet access, and local and long distance solutions through our strategic partnerships with the leading national and regional voice & data providers. We make it simple and efficient by providing a single point of contact for all your needs.

Experience Matters

Experience The Difference

Providing the optimal wireless package for your business is not “just making the sale” at Grudi Associates. It is an ongoing process of delivering unparalleled advice, service and support before, during and after implementation of your wireless solution.

Before The Sale

Identifying Needs—We provide a free wireless audit, including a review of your wireless usage and needs, bills, equipment and plan.

Recommended Solutions—With a clear understanding of your needs, resources and preferences, we can offer the right choices and options for your company.

During Implementation

Installation and Setup—Every phone and data device is charged, tested and programmed, so you can start communicating more effectively right away.

Delivery—Our representatives will hand deliver your devices to your location.

Training—Grudi Associates' experienced wireless professionals will train your staff and explain key features and capabilities of your devices.

Enhanced Service Options—For customers who need additional assistance or prefer to outsource various functions, Grudi Associates offers an array of valuable services through our Enhanced and Managed Solutions Service Options (contact Grudi Associates for details). The fee will be based on service plan.

After The Sale

Team Support—We make getting help easy with multiple channels of support from our representatives or directly from the carrier. We'll answer questions, provide assistance, share new items and capabilities, and assess your changing wireless needs.

Immediate Answers—Our experienced customer service representatives can immediately answer over 80% of your questions, without sending you to the provider.

Bill Auditing and Management—We offer tracking, corrections, updates and analysis of your bills through Grudi Associates Managed SolutionsSM for an additional fee.

Big Picture Solutions—We can offer innovative solutions for integrating all your wireless, local, long distance, data and high-speed Internet systems.
